5. Radio Programming Standard
6. Deployment Checklist
7. Net Control Station (NCS) Quick Guide
8. Operator Accountability Roster
9. Field Operator Quick Reference Card

## 1. Approval & Signature Page

This document is approved for official use by Freestone County ARES for emergency communications, training, activations, and support to served agencies.

Approved By:

**Brian Davis**

Freestone County ARES Emergency Coordinator

Date: 8/30/2026

## 2. Document Control & Revision History

This document shall be reviewed annually or after significant operational changes.

| Version | Date       | Revision                                                                             |
|---------|------------|--------------------------------------------------------------------------------------|
| 1.0     | 05/10/2026 | Initial PACE Plan                                                                    |
| 1.1     | 05/11/2026 | Added ICS-205 Annex                                                                  |
| 1.2     | 05/11/2026 | Channel alignment corrections                                                        |
| 1.3     | 05/12/2026 | Formatting corrections                                                               |
| 2.0     | 05/12/2026 | Expanded SOP language                                                                |
| 3.0     | 05/12/2026 | Added roster, NCS, checklist                                                         |
| 4.0     | 05/12/2026 | PACE verbiage restored                                                               |
| 5.0     | 05/24/2026 | Professional manual finalized                                                        |
| 6.0     | 06/09/2026 | Finalized and signed by EC                                                           |
| 7.0     | 07/04/2026 | Update PACE Plan to reflect repeater changes.                                        |
| 7.1     | 8/30/2026  | Update PACE Plan to reflect repeater changes and added to the Accountability Roster. |

### 3. Communications PACE Plan

Purpose: This PACE Plan establishes a structured communications framework for Freestone County ARES to ensure reliable and continuous communications during normal operations, activations, and emergency situations.

#### Primary (P) - Normal Operations

FF 110 Repeater: 145.110 MHz / -600 Offset / Tone 146.2 / Channel 1

Weekly ARES Net: Every Sunday evening at 2000 Hours on the DFY repeater. Standard operating mode - FM Voice.

#### Alternate (A) - Backup Method

WRTM 760 Repeater: 146.760 MHz / -600 Offset / Tone 136.5 / Channel 2

#### Contingency (C) - Degraded Communications

ARES TAC: 146.580 MHz / Tone 123 / Channel 9

#### Emergency (E) - Last Resort

HF communications. GMRS or physical message delivery.

## 4. ICS-205 Communications Annex

| Ch | Name     | Frequency | Tone<br>(CTCSS) | Mode    | Use/Remarks                                           |

| 14 | ARES-5   | 147.800   | 123.0           | FM      | VHF Simplex                                           |
| 15 | ARES-6   | 433.145   | 123.0           | FM      | UHF Simplex                                           |
| 16 | ARES-7   | 433.525   | 123.0           | FM      | UHF Simplex                                           |
| 17 | ARES-8   | 433.775   | 123.0           | FM      | UHF Simplex                                           |
| 18 | ARES-9   | 444.215   | 123.0           | FM      | UHF Simplex                                           |
| 19 | ARES-10  | 444.715   | 123.0           | FM      | UHF Simplex                                           |
| 28 | DATA-V   | 144.975   | 123.0           | DIGITAL | Digital (Winlink/Packet)                              |
| 29 | DATA-U   | 438.775   | 123.0           | DIGITAL | Digital (Winlink/Packet)                              |
| 30 | APRS     | 144.390   | None            | PACKET  | Packet                                                |

## 6. Deployment Checklist

- Radio programmed
- Charged batteries
- Spare batteries
- Go-Bag
- Antenna and coax
- Personal medications
- Notebook and pens
- Flashlight/headlamp
- Portable power source

## **7. Net Control Station (NCS) Quick Guide**

- Establish control frequency and directed net
- Conduct roll call and accountability
- Log all traffic when possible
- Prioritize emergency and priority traffic
- Escalate failures according to the PACE Plan
- Coordinate with the EC and served agencies

## 8. Operator Accountability Roster

| NAME              | CALL   | GMRS    | CLASS   | CELL         | EMAIL                     |
